IDENTIFIERS *Kentucky

ABSTRACT

This bulletin contains information concerning the total annual calculated cost for pupil transportation for those Kentucky school districts that provide this service. The tentative calculated cost figures are based on the districts' reports for the 1978-79 school year. Under the Minimum Foundation Program the major portion of the district's allotment for pupil transportation for the current year is based on the district's cost for this service for the previous school year. The primary purpose of this bulletin is to show the calculation for growth in pupils and the final calculated pupil transportation costs for the 1979-80 school year. (Author/MLF)

SUPERINTENDENT OF PUBLIC INSTRUCTION

January, 1980

This bulletin contains information concerning the total annual calculated cost for pupil transportation for those of Kentucky's school districts that provide this service. The tentative calculated cost figures are based on the districts' reports for the 1978-79 school year. As you know under the Minimum Foundation Program, the major portion of the district's allotment for pupil transportation for the current year is based on the district's cost for this service for the previous school year.

The primary purpose of this bulletin is to show the calculation for growth in (T-1) pupils and the final calculated pupil transportation costs for the 1979-80 school year. In making the growth and final calculation, it is necessary to include a column showing the tentative calculated pupil transportation program cost for each district. Therefore, the figures showing the tentative, growth and final pupil transportation program costs are all three shown in this bulletin.

Only two bulletins will be issued each school year concerning the pupil transportation program cost calculations. The tentative cost bulletin will be issued during the first third of the school year, and the growth and final cost bulletin will be issued during the last third of the school year.

Raymond Barber
Superintendent of Public Instruction

MAR 2 1 1980

Foreword

This basis for allotments bulletin contains all of the basic information relating to the Growth Calculation and Final Program Cost Calculation for Pupil Transportation. This is the final pupil transportation program cost calculation for the 1979-80 school year. The pupil transportation program cost figures shown in the last column of figures in this bulletin will serve as the final basis for allotments to the districts as provided by the Minimum Foundation Program. KRS 157.370, KRS 157.390, and certain Kentucky Administrative Regulations provide the authority for making this calculation.

It should be pointed out that the amount shown in the last column of this calculation is not the amount of money that the district will receive from the Minimum Foundation Program for the pupil transportation services provided by the district. The amount shown in this Final Program Cost Calculation for pupil transportation becomes one of the four items that make up the district's calculated cost for its total school program. This total calculated program cost becomes the basis for determining the district's allotment when all of the requirements of the Minimum Foundation Program are applied to it.

The district receives the same percentage of the final calculated cost of its pupil transportation program that it receives from the other three Minimum Foundation Program costs since the allotment percentage is calculated on the total Minimum Foundation Program of which the pupil transportation program cost is a part.

It should be noted that the amount shown in this Final Pupil Transportation Program Cost Calculation for each district is simply the amount shown in the Tentative Calculation increased by the calculated amount for current year net growth in T-1 pupils. The calculated cost for growth is determined by multiplying the tentative cost by the percent of net growth in T-1 pupils. If a district has a loss in T-1 pupils for the 1979-80 school year, this will be reflected in the district's calculated pupil transportation cost for the 1979-80 school year; therefore, no deduction for loss in T-1 pupils is made during the current school year.

It should be stressed that, in the plans for improving the calculations for pupil transportation in succeeding school years, the district that upgrades its school buses regularly, uses the largest buses that are feasible, and keeps its school buses within the designated eight-year depreciation schedule will come the nearest to receiving its full potential under the Minimum Foundation Program.

A district can have both an economical operation and a safe operation through adequate planning and supervision.

DIVISION OF PUPIL TRANSPORTATION

Table of Contents

	Page
Foreword	v
Source and Method of Calculation	1
Calculation for County Districts	2-5
Calculation for Independent Districts	6-7
Calculation Totals for All Districts	7
Summary of (T-1) Pupils - Gains and Losses	8
(T-1) Pupil Growth (County Districts)	9
Percentage of (T-1) Pupil Growth (County Districts)	10
(T-1) Pupil Loss (County Districts)	11
Percentage of (T-1) Pupil Loss (County Districts)	12
(T-1) Pupil Growth (Independent Districts)	13
Percentage of (T-1) Pupil Growth (Independent Districts)	14
(T-1) Pupil Loss (Independent Districts)	15
Percentage of (T-1) Pupil Loss (Independent Districts)	16

Method of Calculation

Column 1. The figures in this column show the net number of (T-1) pupils in average daily attendance for the first two months of the 1979-80 school year. These figures are certified to the Division of Pupil Transportation by the Division of Pupil Personnel Attendance and Accounting.

Column 2. The figures in this column show the net number of (T-1) pupils in average daily attendance for the first two months of the 1978-79 school year. These figures are certified to the Division of Pupil Transportation by the Division of Pupil Personnel Attendance and Accounting.

Column 3. The figures in this column are secured by subtracting Column 2 from Column 1.

Column 4. The figures in this column are secured by subtracting Column 1 from Column 2.

Column 5. The percent of growth in the net average daily attendance of (T-1) pupils for the first two months of the 1979-80 school year as shown in this column was secured by dividing Column 3 by Column 2.

Column 6. The percent of loss in the net average daily attendance of (T-1) pupils for the first two months of the 1978-79 school year as shown in this column was secured by dividing Column 4 by Column 2.

Column 7. The amounts shown in this column were taken from Column 23 as shown in the bulletin, PUPIL TRANSPORTATION TENTATIVE CALCULATIONS, for the 1979-80 school year. This bulletin is dated November, 1979.

Column 8. The amounts shown in this column were secured by multiplying Column 7 by Column 5.

Column 9. The amounts shown in this column were secured by adding the amounts shown in Column 8 to the amounts shown in Column 7. The amounts shown in this column are the amounts certified to the Division of Local School District Finance to be used as the Final Calculated Pupil Transportation Program Cost in the calculation of the Minimum Foundation Program allotments.

NOTE: The other materials contained in this bulletin are included for statistical and comparative purposes.
